The radio-Frequency amplifier for
medical treatments (MRI)

Radio-Frequency amplifier (QLF series)

Radio-Frequency Amplifier

With radio-frequency and power electronics technology we contribute to customers' high performance and efficiency improvement needs.

Key Features

- The lineup of the frequency band (12.77 MHz ~ 21.29 MHz) and rated output level (1 kW ~ 5 kW) corresponding to each magnetic field (0.3 T ~ 0.5 T).
- High linearity and a low noise
- UL and IEC standard

Specifications

Tesla		0.3T	0.35T	0.4T	0.5T
Operation Frequency (*1)		12.77MHz	14.90MHz	17.00MHz	21.29MHz
Frequency Range		< +/-200kHz			
Peak Output Power	4ch	1.25kW x 4 (Total 5kW)			
	2ch	2.5kW x 2 (Total 5kW)			
	1ch	5kW			
Cooling		Air			
RF Input		0dBm x1			
Impedance		50ohm			
VSWR		4.0:1 or less			
Gain		61dB(4ch)/ 64dB(2ch)/ 67dB(1ch)			

Average Power		250W
Max Gate On Time		60msec
Max Gate On Duty		50% maximum for low output power 15% maximum @ Rated output power
Gain Linearity		±1.0dB or less(50Ω)
Phase Linearity(between ch1 and ch2)		0 ± 5 degrees
Droop (Pulse Wide = 3.5msec)		-
Harmonics		-30 dBc or less (50Ω)
Output Noise Power <Blanked> (Center Frequency +/-200kHz)		-160dBm/Hz or less
Interface		RS422 conforming TTL(Gate Signal)
Main Voltage		single phase AC 220V ±10%
Dimension	Height	177mm
	Depth	567mm
	Width	478mm

(*1) Operation Frequency will be customized by MRI maker's request.

Precautions on handling products

- If you wish to purchase and use any of the products and/or technologies shown in this site, please read the applicable individual technical material or delivery specifications and observe the instructions.
When designing and producing equipment or products using any of the products shown in this site, please pay full attention to safety, based on a thorough understanding of the nature and characteristics of the product.
- If you intend to use any of the products or technologies shown in this site for any products whose failure or malfunction could directly threaten human life or endanger people, or for any products whose failure could trigger major property damage (such as products in the fields of nuclear power, aerospace, transportation, medicine and safety devices), make sure to consult our customer-relations desk.
We will not be held responsible for any damage that may arise due to use of such products or technologies of ours without consultation with us.
- The products and technologies shown in this site include those whose export or provision to outside of Japan is controlled under the Foreign Exchange and Foreign Trade Control Law of Japan.
- The products and technologies shown in this site include those which are controlled under the export control rules of the U.S.A., and require a permit from the US Government, depending on the export destination, if they are to be exported outside of Japan.
- The technical information shown in this site is only for explaining typical actions and applications of the products. It does not constitute any guarantee or license related to the intellectual property rights of our company and/or third parties for use of the products.
- The contents of this site are subject to change without notice, in line with technological progress.
